LA CANTINA ITALIANA

La Cantina Italiana nasce per dare, a chi fa del vino la propria passione, un luogo che permetta di conservare ed esibire la propria collezione in modo elegante e raffinato. La sua creazione segue un percorso caratterizzato da due momenti fondamentali: *lo studio* svolto dai nostri progettisti e *la realizzazione* nel proprio laboratorio. Questa sequenza permette di creare un prodotto di elevata qualità e prestigio, in perfetta armonia con l'ambiente che lo circonda.

La Cantina Italiana was born to give people who love wine, a place where conserve and show their own collection in an elegant and innovative way. Its creation is composed by two key moments: *the study*, carried out by our designers and *the production* through our own laboratory. The sequence allows to create a product of high quality and noble character, in perfect harmony with the environment that surrounds it.

realizzazione | construction

Dopo il concept e il design, il momento della costruzione e posa è caratterizzato da precisione e rigore. La Cantina Italiana e le proprie maestranze offrono un'esperienza a 360°, che appunto parte dalla creatività e progettazione, per giungere alla messa in opera. Avrete così la certezza che la vostra cantina interrata sarà realizzata rispettando standard di eccellenza assoluta.

After the concept and the design, the time of construction and installation is characterized by precision and rigor. La Cantina Italiana and its skilled workers offer a 360 ° experience, which starts from creativity and design, to achieve the final realization. In this way you will be sure that your exclusive wine cellar is built in compliance with the highest standards of excellence.
